

Computer Assisted Language Learning (CALL) Resources Overview

This document shows some of the more widely-used CALL resources and is designed as a starting point to help you explore and select tools that may serve teachers and students in your context and those you are supporting. We suggest you identify a number of tools that may be of use and then research them in more detail. Student access procedures, licensing costs, age limits and GDPR considerations will vary according your school's specific context, IT policies, hardware and VLE. Please do share your own CALL successes with NCELP.

Resource	Description	Cost	Dashboard / Monitoring	Vocab Lists	Platform	Additional Notes
