

NCELP Grammar TRG

NCELP | National Centre for Excellence
for Language Pedagogy

PRIOR TO THE TRG SESSION: Hub teachers must have read the **two handouts** (Handout 1: What determines the difficulty of grammar. Handout 2: Principles of teacher grammar) and the **5 OASIS SUMMARIES** before attending the TRG session, as these handouts form the basis of the discussion throughout the session.

Aims of the session

- Develop an understanding of the research evidence relating to L2 grammar teaching and learning
- Develop more concrete ideas for teaching grammar, including how to **introduce, embed and consolidate, and extend** grammar knowledge
- Explore some of the NCELP resources and approaches for grammar learning
- Understand the ways in which you will work with the Lead Schools to develop practice in this area

Content of the session

1. Key issue 1: What grammar to teach and when
(determining the difficulty of grammar; order of teaching; setting and managing expectations)
2. Key issue 2: Principles of how to teach grammar (and the concerns!)
3. Summary of key principles for grammar teaching
4. Sample resources
5. Hands-on classroom activity development
6. Grammar teaching discussion document for observing lessons
7. Update on scheme of work

Content of the session

Parts 1 - 3 should take about 45 minutes – these are the ground work, about underpinning principles.

Please ensure we move on to parts 4 - 7 as these include examples of resources and hands on activities.

Suggested timings for delivering the TRG. NB Please amend depending on the length of your session. This suggested timing assumes a 3 hour session:

- 1: Brief summary of key principles: max 5 minutes – just read it through - all this will be covered again in the session
2. Key issue 1 – about 20 minutes, including **handout 1** (determining difficulty)
3. Key issue 2 – about 25 minutes, including **handout 2** (principles of teaching) and ‘concerns’ (the activity critiquing grammar presentation and practice in some textbooks)
4. Sample resources – about 1 hour 15 mins in total – depending on the languages of the teachers you have, but try to present examples of each language, and examples of morphology (inflections for person, number, tense) and syntax (questions, negation). The question word slides should also be shown. These are important, and they link to the vocabulary CPD, and will be necessary for when more complex questions are being taught.
5. Hands-on activities and resource development - about 30 minutes (15 mins on listening and/or reading; 15 mins on speaking and/or writing)
6. Grammar teaching discussion (observation record) – about 20 minutes, including

discussion

7. Update on SoW – ***no more than 5 minutes*** – keep this brief – it could turn into a long discussion but there will be opportunity for this in later CPD

Summary of what covered at end - 5 minutes

This leaves *a bit* of time for slippage and extra discussion/ questions etc. but not much at all! Pace will be important, as always.

Please remind them to complete the feedback survey at the end – your Hub teachers should have received a link. If they can complete the survey there and then, that would be ideal.

Key issues

Key issue 1: What order should grammar be taught in?

- What determines the difficulty of grammar?
- What grammar can we expect learners to use, and when?

Key issue 2: What are the best ways to teach grammar?

- Effective ways to **introduce, embed and consolidate, and extend** grammar

We will cover these key areas

So the first Key issue relates to the notion of progression: what should be taught when, what can we expect learners to learn, when – that is, can we determine the difficulty of grammar to put it in a sensible order for teaching?

The second key issue is about effective methods for teaching grammar

Key issues: But first... is grammar teaching useful? Yes!

- Even after 100s of hours of exposure to an L2, learners still struggle with certain grammar
- Lots of evidence that explicitly teaching grammar can be beneficial
- Explicitly teaching grammar tends to be more effective than waiting for learners to pick up grammatical patterns themselves
- Brief description of the grammar before practice can speed up the rate of learning

(e.g. **Kasprowicz & Marsden, 2018**; **Lichtman, 2016**; **Marsden, 2006**; **Norris & Ortega, 2001**; Schmidt, 1990; Spada & Tomita, 2010; White, Spada, Lightbown, & Ranta, 1991)

For evidence, see summaries of research into grammar teaching: on OASIS or NCELP Resource Portal.

We first just emphasise the importance of explicit grammar teaching. It is important to point this out because: whether or not to teach grammar has been under debate for several decades in foreign language education and, as a result, messages have not always been clear in policy documents, in textbooks, or across different schools and classrooms.

Point out that the 4 references in **bold** are those that are included in the 5 OASIS summaries that were sent to Hub teachers before the TRG session.

Key issue 1: What order should grammar be taught in?

- There is little strong evidence to support *one prescribed* order for teaching grammar
- **Many factors** affect what can effectively be taught and learnt and *when* (e.g. the grammar feature, learner characteristics, task modality, context)
- But we do know...
 - The introduction of whole 'paradigms' at once has little support from research
 - Learners can only pay attention to a limited number of features at any one time
 - Introducing and practising **pairs of grammar features** with contrasting meanings (or functions) can lead to accurate understanding and production of the grammar features.
 - Regular practice and re-visiting are necessary

(DeKeyser, 2005; DeKeyser, 2015; Ellis, 2006; Mitchell, Myles, & Marsden, 2019; VanPatten, 2004)

Summarising What we know (or don't know!) about the order grammar should be taught

*Re. bullet point 2 - On next slide going to talk more about factors that can make grammar difficult to learn.

Reference in **bold** is included in the 5 OASIS summaries that will be sent to teachers for the TRG sessions

Some extra information for the TRG deliverers about the avoidance of whole paradigms. There is **no need to dwell on this** but we put it here for your information, in case Hub teachers ask. This is a really important message and should not be diluted, as hedging is likely to reduce the clarity and impact of the message. The evidence and arguments for this are also explained in the 'what makes grammar difficult' document. The evidence is multi-layered, drawn from multiple sources and even multiple disciplines. Explicit information (i.e., 'rules about language') in and of itself, no matter when, how or what is taught, is not as effective as the practice itself. Whether explicit information is given as a whole paradigm or whether it is before or after practice, or given by teachers or worked out by learners is less important than the nature and the amount of practice. It is the **practice** that has been found to help: **Making grammar essential** for comprehension and production is where the most benefits lie (*not* in the explicit information) – so, in a way, this debate is not important, and, if dwelt upon, could

seriously detract attention from the *much, much more* important messages. But for the sake of argument... here are some additional points:

- Explicit information is prone to decay over time.
- Explicit information alone does not result in evidence of learning in different contexts, modes and modalities (evidence from the old grammar translation approaches).
- The usefulness of explicit information is **very** variable for different learners.
- There is **ample** evidence in cognitive psychology and language learning research that presenting whole new sets (of *anything*) all at once cannot be expected to result in robust or reliable learning in the longer term.
- The conceptual and formal complexity of (and, often, lack of familiarity with) morphology is an additional reason not to expect 'whole paradigms' per se to really show many learning benefits, compared to other more **conceptually**-oriented presentations, which focus on the meaning and function of grammar.
- Languages are not learnt in whole sets as these are artificially put together by grammarians (that are based on the early teaching of Latin).
- There is evidence from cognitive linguistics that it is awareness and understanding of **concepts that are often not reliably, overtly expressed in the L1** (such as plurality of subjects; temporal such as 'complete in the past'; or 'doubt'; habituality) that can help learning. 'Paradigms' (within one of these 'concepts', such as 'past complete') do not serve the aim of teaching learners about the function of grammar.
- In a time-poor classroom, giving (a lot of) explicit information is unlikely to be an efficient use of time
- It risks confusing or overloading many learners during the initial presentation stages
- It sets unrealistic expectations about what has really been learnt.
- Grammar is learnt by frequent re-visiting and practising, and its success depends on a much wider range of factors than 'whether the inflections happen to fit together in one paradigm'.
- By sending the message that whole paradigm teaching is very unlikely to be effective (in terms of robust, reliable learning, in all modes and modalities, in the long term memory), we are helping teachers to set their expectations more realistically.

Key issue 1 (continued): What grammar can we expect learners to use, and when?

- Learners need to understand the meaning (or function) of grammar **before** producing it
- There is often a difference between the grammar learners **understand** (in reading or listening) and the grammar learners can **produce** accurately (in speech or writing)
- The grammar learners can produce in writing is often different from the grammar they can use in (more spontaneous) speaking
- Once knowledge has been practised, it can become “skill-specific”
 - This means that it can be less useful for other skills: if it has been practised and proceduralised for one purpose, the knowledge is less transferable to other purposes
- Therefore, learners need lots of practice in **both modalities** (oral and written) and **both modes** (comprehension and production)

(Bui & Skehan, 2018; DeKeyser, 2015; Mitchell, Myles, & Marsden, 2019; VanPatten, 2004)

Key issue 1: What we can expect from learners

Key issue 1, (continued): Determining the difficulty of grammar

What determines the difficulty of grammar?

Summing up the last two slides, please review the Handout 1, “*What determines the difficulty of grammar in a second language?*”

Discussion around Handout 1:

- Which grammar features do your pupils (in years 7, 8 & 9) find difficult?
- How do you know they find it difficult? Across all modalities/modes?
- Based on the factors mentioned in the handout, **why** do you think those features cause difficulty?

Key Issue 1: Determining the difficulty of grammar (going deeper on the key recommendations from NCELP)

Direct Hub teachers to **Handout [1]** What determines the difficulty of grammar in a second language. They should have been sent this ahead of the TRG session and been asked to read it. But give time for the Hub teachers to skim through again to refresh themselves (about 5 or 10 minutes) and ask questions.

REFLECTION QUESTIONS:

Ques 1) which grammar features do your pupils particularly struggle with? Based on the factors mentioned in the handout, discuss why the features mentioned cause particular difficulty.

Ques 2) Follow on question: what does the information in this sheet mean for ordering/SoW planning? More difficulty could mean teach it later OR introduce it sooner, of course! Sooner, with lots of revisiting and practice, might help to give more exposure; BUT if it is too conceptually or formally (e.g. the form of new sounds or spellings) difficult, then sooner might NOT be sensible before other types of knowledge are in place.

The important point is: having some understanding of difficulty helps **manage our expectations – it is essential for when we are testing knowledge and it informs our thinking about what we teach and how we teach it.**

Note that once the Hub teachers have seen the example resources, some

possible orders for teaching pairs of features will start to emerge – NB this only becomes really apparent after seeing some sequences, later in the session.

Key issue 2: What are the best ways to teach grammar?

Read Handout 2

"Principles of teaching grammar"

Discussion around Handout 2:

1) Which elements do you think align with practice in your school?

2) Which elements do you think will be more challenging to establish in your schools?

Summary of key recommendations:

- i. Provide a **short** description of the grammar **before** practice in the input
- ii. Regularly strip out all other cues so that the learner **has to** pay attention to the grammar **and** its meaning in the input (in reading **and** listening)
- iii. Establish grammatical knowledge in reading and listening before expecting learners to produce the grammar in writing and speaking
- iv. Gradually move from scaffolded production practice to more meaningful, freer production practice
- v. Regularly re-visit the grammar feature, in different contexts, with different vocabulary

Key recommendations about how grammar should be taught

Allow time to remind themselves of the content of **Handout 2. 'Principles of teaching grammar'**. This will probably take around 5-10 minutes. They should have been sent them before the session, so this is a chance to skim them and remind themselves.

Show the summary of key recommendations on the slide, **before** starting the discussion

Then host a **short** discussion – encourage the Hub teachers to reflect on challenges in their own context.

This might also elicit some challenges that you (STs) have encountered in implementing NCELP's recommendations following the Grammar CPD.

Keep the discussion about challenges quite short so that it moves quite soon in to focusing on textbooks – the next activity.

Key issue 2: Effective ways of teaching grammar

What are the concerns?

Review excerpts from a textbook (see Handouts 3 to 5 with examples)

Reflect on some **concerns** about how grammar is often presented and practised. Keep a look out for potential problems, such as :

1. **whole paradigms** at once
2. no or little active (=forced) practice to link grammar to meaning **in input**
3. **jumping straight from** explanation or mere 'exposure' to production
4. production practice that is **mechanical, e.g.**,
 - a. doesn't force learners to actively choose which grammar is needed;
 - b. practice with just a small, fixed set of vocabulary.

Handout 3, 4, 5– printed excerpts from textbooks (3 A3 print outs – one for each language)

In the light of the handout you have just read about principles of grammar teaching, reflect on discussion about common difficulties / challenges with the way grammar is presented in textbooks.

Give Hub teachers the opportunity to review and discuss the textbook excerpts, before displaying and talking through the concerns listed on the slide.

Please see slides 172, 173, 174 with annotated versions of the textbook excerpts, which highlight some of the key concerns explained on the slide and below.

The handouts are the excerpts that were used at the Residential. These textbook example activities illustrate 5 key concerns:

- 1) INPUT BASED ACTIVITIES THAT DON'T ACTUALLY ORIENT/FORCE LEARNERS' ATTENTION ON THE GRAMMAR, AS THEY ALLOW THEM TO ANSWER WITHOUT REALLY HAVING TO ATTEND TO THE FEATURE
- 2) WHOLE PARADIGMS BEING PRESENTED ALL AT ONCE with no clear follow up to practise them all in meaningful ways
- 3) SWIFT MOVES FROM GRAMMAR EXPLANATION TO PRODUCTION PRACTICE;
- 4) PRODUCTION PRACTICE THAT IS 'MECHANICAL' – THE ACTIVITIES DON'T FORCE THE LEARNER TO **ACTIVELY CHOOSE** BETWEEN DIFFERENT GRAMMATICAL FEATURES

(E.G. THEY MIGHT SAY 'DESCRIBE WHAT YOU DID LAST WEEKEND' OR 'DESCRIBE YOUR FRIEND'S APPEARANCE' OR 'YOUR IDEAL X' – BUT THEY DON'T ENSURE **DIFFERENT** FEATURES NEED TO BE ACTIVELY CHOSEN (INSTEAD, LEARNERS CAN COPY FROM A FRAME, OR MECHANICALLY REPEAT A PATTERN THEY HAVE JUST BEEN TOLD ABOUT, WITHOUT CONNECTING TO A MEANING (OR FUNCTION) EACH TIME THEY USE IT).

- 5) PRACTICE IS JUST WITH A SMALL SET OF VOCABULARY WITHIN ONE TOPIC E.G. 'PAS' JUST PRACTISED WITH 'AIMER', OR PAST TENSE (EVEN PERHAPS IN ONE OR TWO 'PERSONS') WITH JUST 3 OR 4 VERBS ABOUT HOLIDAY ACTIVITIES AND THEN NOT REVISITED LATER WITH A WIDER RANGE OF VERBS

It might be helpful to explain that when we talk about textbooks, we note that: They are space-limited and they should not represent all the teaching that needs to take place. Using them requires judicious selection, omission, independent planning. Teachers should not feel that they need to slavishly follow the book's own SOW, cramming the pages in without really thinking about what is realistic for learners to learn. Planning should always 'step away from the textbook', whichever textbook it is, both longer term planning but also day-to-day reflection about the sort of opportunities for practice that learners need (this applies to all of our strands: phonics, vocabulary, grammar and MP).

Summary of key principles for teaching grammar

To help learners connect grammatical features to their meaning (or function) in order to develop accurate use across modalities (oral and written) and modes (comprehension and production), it is important to:

- i. Focus on pairs or very small sets of features and avoid introducing and practising whole paradigms at once, especially in the early stages.
- ii. Provide a **short**, explicit explanation
- iii. Strip out other cues so that the learner **has to** pay attention to the grammar **and** its meaning in the input (reading / listening)
- iv. Establish and practise grammatical knowledge in **reading and listening**
- v. Give plenty of practice in **producing** the grammar in writing and speaking activities that make the grammar **matter** to communicate meaning
- vi. Gradually move from scaffolded production practice to more meaningful, freer production practice

Summary of parts 1 and 2: Aims of teaching grammar and six key considerations

NB: These are NCELP's key 'take-home' messages and recommendations for grammar learning

Give teachers a chance to read through these key principles and recommendations. Before moving onto the next section containing example resources which exemplify these key principles.

*explanation first – most reliable for most learners most of the time

*Pre-emptive – anticipating the features learners will have difficulty with

Content of sample resources

- 1) Explanation
- 2) Reading
- 3) Listening
- 4) Writing (controlled)
- 5) Speaking (controlled)

How to teach and learn grammar

We now provide examples of sequences of activities for each of the languages: Spanish, French & German

For each language we will present at least one full sequence:

- 1) Explanation
- 2) Reading
- 3) Listening
- 4) Writing (controlled)
- 5) Speaking (controlled)

But we will also provide examples of other grammar features, to show how the principles can be extended to a range of features, modes, modalities.

We give examples of 1) verb morphology (that is, verb inflections for person,

number, tense) and 2) for syntax (S V order in French) and negation in Spanish.

NCELP also have developed or are currently developing materials for adjectival agreement, for articles, for aspect (imperfect in French - whether something is ongoing or complete).

Example resources for French

- 1) Explanation
- 2) Reading
- 3) Listening
- 4) Writing (controlled)
- 5) Speaking (controlled)

How to teach and learn grammar

Go through and discuss example sequence of resources in each language (different grammar features across the three languages).

Please note: There will always be a 'vocabulary challenge' with the move from input (R/L) activities to production (W/S) activities, in terms of the **vocabulary** (nouns, prepositions, adjectives etc) that will be needed for production activities.

The aim is to let learners **try** to recall the necessary vocabulary (i.e., not always provide whole speaking or writing frames for everything).

But, where necessary, more scaffolding is possible (we have provided lists of vocabulary for teachers to use with selected pupils, perhaps)

Try to focus on rewarding the grammar point under focus, and not worry too much about everything else being accurate . If we want everything to be accurate all the time, this is what leads to very rigid formulae teaching, and the over-use of strict writing frames that don't provide any desirable difficulty for the learners.

In other words:

The key is that learners are getting the grammatical markers correct and pulling out the verbs from memory. Support with the other vocabulary is ok (particularly in the earlier controlled production activities) and some

errors in this other vocabulary can be tolerated (e.g., adjectival agreement if that hasn't been taught yet).
Try to aim for 'desirable difficulty' and resist the temptation to use lots of frames and holistic phrases.

We will now look at an example sequence of resources for French. We have an example to show you about syntax (question formation, using SV inversion).

Statements vs. Questions

'You', 2nd person singular

Asking questions: You (*singular*)

In English, to ask a 'yes/no' question we can use the phrase 'Do you...' followed by the verb e.g., Do you eat pizza? -> 'Yes'. Do you play football? -> 'No'

In French, we swap round the verb and the subject pronoun (e.g., 'tu' - you) to change a statement into a question, like this:

Statement

Tu aimes la pizza. **You like** pizza.

Question

Aimes-tu la pizza? **Do you like** pizza?

So, here you will again see the sequence: brief explicit grammar description, focusing on the function of the grammar.

Followed by a reading, then listening, then writing and speaking

TEACHER VERSION WITH ANSWERS

Lire

A French blog writer interviews you and your friends by email about teenage life in England. But the email got corrupted. Decide if the sentences could be statements about something he knows already (write **S**) or have to be questions (write **Q**), so you can reply with your answers. Remember that when the **verb and subject swap**, it must be a question. For all questions, answer with 'oui' or 'non' to say whether this is something you and your friends do.

		Q/S	oui/ non			Q/S	oui/ non
1	Jouez-vous au foot	Q		7	Parlez-vous français	Q	
2	Vous pensez que c'est vrai	S		8	Comprenez-vous la question	Q	
3	Vous demandez la raison	S		9	Vous mangez des fruits	S	
4	Allez-vous en ville	Q		10	Vous préparez le dîner	S	
5	Avez-vous un animal	Q		11	Vous sortez ce weekend	S	
6	Vous aimez le chocolat	S		12	Voulez-vous sortir ce weekend	Q	

Punctuation has been removed here so that students have no other clue apart from the verb. Asking learners to write 'oui' or 'non' where the sentence is a question adds the element of reading for meaning at this stage, as well as identifying the statement or question.

To complete the task, students can work from the board, writing 1-12, Q or S, Oui / Non. Alternatively, the following two slides can be used to print student A5 copies.

Verb frequency rankings (1 is the most common word in French): jouer (219); penser (116); demander (80); aller (53); aimer (242); parler (106); comprendre (95); manger (1338); préparer (368); sortir (309); vouloir (57).

ANSWERS

Écouter

Your French friend has left a voicemail for your brother. He needs help to understand it! Listen. Decide if each utterance is a fact (*write F* = something she already knows about your brother) or a question (*write Q* = something she wants to know).

Remember that the **verb** and **subject pronoun swap round** when it is a question.

1	Q	7	Q
2	F	8	F
3	Q	9	F
4	Q	10	F
5	F	11	Q
6	Q	12	F

There are no other cues to help you. The intonation on the voicemail is flat, like a computerized voice!

NB these sentences have been recorded **without** intonation, to remove additional cues that would otherwise help students identify between a statement and a question, so as to retain their focus on the initial verb.

Click on each orange number to trigger the audio. Each utterance is heard twice. Click again to repeat, as required.

Transcript

- 1) Joues-tu au foot?
- 2) Tu demandes la raison.
- 3) Vas-tu en ville?
- 4) As-tu un animal?
- 5) Tu aimes le chocolat.
- 6) Parles-tu français?
- 7) Comprends-tu la question?
- 8) Tu manges des fruits.
- 9) Tu sors ce weekend.
- 10) Tu prépares le dîner.
- 11) Veux-tu sortir?
- 12) Tu penses que c'est vrai.

Verb frequency rankings (1 is the most common word in French): jouer (219); demander

(80); aller (53); avoir (8); aimer (242); parler (106); comprendre (95); manger (1338); sortir (309); préparer (368); penser (116); être (5).

Vocab help

This slide can be used as a quick knowledge check in advance of the production activities to reinforce the meanings of the verbs. This can be done with teacher-led mini whiteboard work and then / or as a printed vocab help sheet for those who will need it during the speaking and the writing. This depends on how familiar the students already are with this selection of verbs.

If using as a printed help sheet, pupils should first try to say what they can and leave blanks, e.g. for any of the lexical verbs they don't know. This shows them what they don't know, a learning process known as "noticing the gap". The aim is to 'force recall', by not giving them all the language that they can then just manipulate mechanically. They have to 'pull out' the language from their memories.

Teachers may decide that some learners will need the prompts on this slide.

Verb frequency rankings (1 is the most common word in French): jouer (219); faire (25); chanter (1820); dessiner (2086); nager (>5000); sauter (2114).

Source: Lonsdale, D., & Le Bras, Y. (2009). *A Frequency Dictionary of French: Core vocabulary for learners* London: Routledge.

Tu chantes.

EMBEDDING and CONSOLIDATION.

This series of slides: a) revises the key activities, b) enables learners to spot questions and statements, c) makes the intonation difference between statements and questions clear, d) and enables learners to practise making statements and asking questions in the second person singular.

(NB: the slide numbers are correct for the stand-alone PPT for teaching this grammar sequence, rather than these slides that are embedded in the TRG PPT).

Slides 10 to 21 recap of the main verbs and formation of the partitive article, with embedded sound.

Point out that the learners can now hear the difference in intonation for statements and questions. Point out that we also raise our voices when we ask questions in English.

NB. For now, just focus on the idea of “not raising intonation when it is a statement”. There are other practice opportunities to practise making questions simply by raising intonation but keeping the word order the same. The focus here

in this series of activities is just on making pupils attend to the word order.

When using slides 9 to 21 with the whole class, learners could first simply repeat the sentences, making sure they get the intonation correct.

In a second time through these slides, they could be asked to mime the action if it is a statement; but if it is a question, they could nod or shake their head to answer the question. Clearly, now, the question marks and the intonation give away more clues than just the word order alone! But they have already had practise in using just the word order, so now we are adding the other cues back in, to help for when they produce questions.

Slide 22 includes picture prompts and learners should be selected to read out the examples with the correct intonation and the correct word order.

Slide 23 encourages learners to think about recalling the correct verb with gapfills. As well as a speaking task, this could also be handed out A5 size as a written activity or learners could write the answers on mini whiteboards.

Slide 24 requires learners to work totally from picture recall. As well as a speaking task, this could also be handed out A5 size as a written activity. A sentence grid is provided for learners to record their answers here.

Slide 27 tests the learners' ability to apply the statement vs question formation with other activities that have not yet been revised. This could be done as a speaking activity and/or a writing activity. Some pupils may need support with vocabulary here.

This session could then lead to pairwork activities: "Bingo" and "All Activities"

Tu joues au football.

Joues-tu du piano?

Extending phase: French

Characteristics of 'extension' can include one or more of:

The same grammar but with **new vocabulary**

new to this sequence of activities, but already familiar to the learners

or, in some situations, a few items of vocabulary could even be entirely new

Providing **less support** for the learners

Including practice of **other grammar features** that have been learned previously

Example of an activity that could be seen as in 'extending phase' : Providing examples of meaningful practice, with new vocabulary and little or no support.

Example of an activity that could be seen as in ‘extending phase’ : Providing examples of meaningful practice, with new vocabulary and little or no support.

EXTENSION with other vocabulary.

This slide challenges the learners’ ability to apply the statement vs question formation with other activities that have not yet been revised.

Note, some learners may need to see some vocabulary first.

Remember, the focus here is on word order, so if pupils don’t shorten the verb from the infinitive to the 2nd person singular, you can gently correct it but don’t get distracted from the main purpose of this activity. There are other opportunities to work more on verb endings, but in **this** activity, try to focus on whether or not the word order and intonation express a question or a statement.

This session could then lead to pairwork activities (“Bingo” and “All Activities”).

Pair Work

Bingo cards (see next slide)

All activities cards →

			
			
		?	
		?	.
		?	.
		?	.

BINGO, forcing learners to produce and notice word order to indicate questions.

Hand out Bingo cards to learners in pairs, one receives the Partner A cards and one receives the Partner B cards. Each learner should first of all fill in appropriate sentences for each picture in the top grid, taking note of whether it is a question (question mark) or a statement (tick).

Once the learners have filled in the cards, they should take it in turns to read at random one of the statements from the eight pictures. Using the bottom grid, the partner should listen to each utterance, work out which picture is being referred to and then add a tick or a question mark. They should take it in turns to do this and once all eight utterances have been read out they should check their answers to see if they have added the correct symbol.

ALL ACTIVITIES, forcing learners to produce and notice word order to indicate questions

Learners could then be given the All Activities cards which contain all images plus full stops and question mark. Students could put the punctuation symbols upside down into one pile and turn the activity cards upside down into another. Each learner should take it in turns to select a card from each pile and either read the activity as a statement or a question! Their partner has to answer 'oui' or 'non' if

it is a question. But if it is a statement, they do not need to answer.

You could ask them to use robotic voices when they make their statements or questions, so that their partner really has to listen out for the word order, and can't use intonation as a clue at all.

They should replace the punctuation cards underneath the pack each time.

Partner A

Using the 'tu' (you, singular) form of the verb, write either a question (?) or statement (✓) for each picture in grid 1.

You and your partner take it in turns to read a sentence chosen at random from grid 1. As you listen to your partner's sentences, identify the correct picture from grid 2, and then add either a (?) if you hear a question or (✓) for a statement.

Grid 1

Grid 2

If you finish, both partners draw a 3 x 3 blank bingo grid in their books. Without showing your partner, write a different question or statement into each square. Try to choose sentences that you don't think your partner will have. Take it in turns to say one of your sentences. If you both have it, you both cross off that square. If one doesn't have it, only the one who has it crosses it off. The winner is the one to cross off all his/her squares first.

Partner B

Using the 'tu' (you, singular) form of the verb, write either a question (?) or statement (✓) for each picture in grid 1.

You and your partner take it in turns to read a sentence chosen at random from grid 1. As you listen to your partner's sentences, identify the correct picture from grid 2, and then add either a (?) if you hear a question or (✓) for a statement.

Grid 1

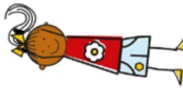

Grid 2

If you finish, both partners draw a 3 x 3 blank bingo grid in their books. Without showing your partner, write a different question or statement into each square. Try to choose sentences that you don't think your partner will have. Take it in turns to say one of your sentences. If you both have it, you both cross off that square. If one doesn't have it, only the one who has it crosses it off. The winner is the one to cross off all his/her squares first.

How to teach and learn grammar

Now going to look at sequence of activities for teaching the perfect tense in German

German – Perfect tense

Explanation and activities

Grammar explanation

Perfect tense - things that have happened in the past

To talk about what you did, use the present tense of 'haben' and a past participle.

Regular past participles sandwich the stem with **ge-** and **-t**.

Infinitive	Stem	Past Participle
machen	mach-	gemacht
spielen	spiel-	gespielt
tanzen	tanz-	getanzt

Note! Some verbs with 'haben' have past participles which don't follow this pattern!

- Ich habe Kuchen **gegessen**.
- Sie hat Freunde **besucht**.

Teacher note: Short grammar explanations can never be fully complete. (For example, of course, some verbs don't follow this pattern as they are irregular). But the aim is to get pupils to learn a 'default', main pattern and then introduce the complexities and exceptions to the rule later. In any case, evidence suggests that it is the **practice** activities that are most helpful for learning (rather than these grammar explanations). But ... these short grammar explanations at the start of practice do seem to speed up some learners in becoming accurate in the practice activities that follow.

Teacher note 2: Use this opportunity to prompt the meanings of the infinitive and past participles at this point, and then later the meaning of the whole phrases with the three examples.

Grammar explanation

Perfect tense – Word order

- The present tense of the verb 'haben' is always the second idea of the sentence.
- The past participle always goes to the end of the sentence.

	haben		past participle
Ich	habe	Fußball	gespielt
Der Mann	hat	jeden Tag	getanzt
Wir	haben	einen Ausflug	gemacht

English learners of German sometimes find it tricky to use the perfect tense.

Why?

1. English word order is different. Learners don't expect a past participle at the end of a sentence.
2. Phrases like 'last week' or 'yesterday' give away the meaning, so it's easy to ignore the verb elements.

Here, the key message is that the past participle is not, alone, a cue to pastness; it is the co-existence of the 'habe' auxiliary and the past participle at the end of the sentence, which tell you the action has been completed. The next two tasks focus on noticing the co-existence of 'habe' and part participle as indicator of past meaning.

Lesen

In den Sommerferien

Susi Sorglos is on the beach writing about her summer holidays so far. However, her diary got wet and smudged!

Read what Susi has written. Decide whether she is describing what she **has done** or what she **is doing**.

- For past activities circle 'Ich habe'.
- For present / ongoing activities circle 'Ich'.

Remember

The perfect tense = 'haben' + past participle of the main verb.
The past participle always comes at the end of the sentence.

Instructions and teaser. The complete activity is available as a word / pdf doc.

Alternatively, students can complete the activity from the board, writing 1-12 and ich or ich habe for each question.

Verb frequency rankings (1 is the most common word in German): spielen (197); besuchen (703); schwimmen (1832); machen (49); lesen (323); essen (655); trinken (609); liegen (118); kaufen (581); wohnen (380); haben (7)

Source: Jones, R.L., & Tschirner, E. (2006). *A Frequency Dictionary of German*. Routledge

Schreiben

Du bist im Urlaub!

You are on holiday. You are doing a lot, but nothing is the same as you did last year on holiday. Use **all** the cards. Write five sentences to describe your activities this year, and five to say what you did last year. Remember to use the right verb(s) for **past** and **present**.

Verb frequency rankings (1 is the most common word in German): spielen (197); lesen (323); besuchen (703); sehen (81); essen (655); schreiben (245); treffen (287)
Source: Jones, R.L., & Tschirner, E. (2006). *A Frequency Dictionary of German*.
Routledge

There is a word version of this task, if required.

NB: This writing primes well for the speaking task. Note though that the listening and reading input tasks have not used the verb 'treffen'. Teachers use their judgement to ensure that sufficient practice with past participles takes place, such that students have mastered the forms they need to complete tasks securely.

Tennis spielen
ein Buch lesen
England besuchen
einen Film sehen
Fußball spielen
Postkarten schreiben
Spanien besuchen
mit einem Freund/einer Freundin treffen
Eis essen

ein Museum besuchen

Extending phase: German

Sprechen

Sam und Chloe im Urlaub

Sam and Chloe are friends chatting on the phone about their holidays.

In pairs, imagine you are Sam and Chloe.

Using the cards, tell each other what you did on holiday last year and what are doing now.

Remember to use the right verb(s) for past/present!

speaking / listening

This could be seen as an example of a consolidation activity or an extension activity because there is little support and some of the vocabulary has not been encountered so far within this sequence.

Talk to the Hub teachers about that fact that we should try to avoid perpetuating a strictly 'dichotomous' idea that one activity is clearly "consolidation" and another is strictly "extension" - the phases merge into each other. It's hard to say what is and what isn't 'extension' To help you decide whether it is extending learners, you can ask: is it extending the grammar feature to new vocab? Is it taking away some support that was given earlier? Are they required to recall or produce the language in a different context or at a faster speed? Also **task demands** make it an extension (e.g. narrating a series of pictures in the 'there and then' rather than the 'here and now']

Verb frequency rankings (1 is the most common word in German): besuchen (703); essen (655); lesen (323); treffen (287); tanzen (1011); spielen (197); schreiben (245)

Source: Jones, R.L., & Tschirner, E. (2006). *A Frequency Dictionary of German*. Routledge

Hilfe

- visit museum → Museum
- visit [Switzerland/Italy] → [die Schweiz/Italien]
- eat [pizza/ice cream] → [Pizza/Eis]
- read a book → ein Buch
- meet a friend → mit einem Freund
- dance →
- play [football/tennis] → [Fußball/Tennis]
- write postcards → Postkarten

ANFANG

speaking / listening

It is anticipated that students know most/all of these high-frequency verbs. This short activity is to re-activate their knowledge of the infinitive verbs ahead of the speaking/listening activity, in which they will be producing either 1st person present or 1st person perfect forms, referring only to the speaking cards and without reference to other notes.

Teachers will use their judgement as to the extent of the 're-activation' (i.e., checking knowledge before the practice) is required.

Click Anfang to start the timer. Clicking on each cloud will reveal the infinitive verb.

NB: In addition, learners will need to know and have practised these past participles: besucht, gegessen, gelesen, getroffen, getanzt, gespielt, geschrieben

NNB: besichtigen is far less frequent than besuchen but it is on the AQA GCSE vocabulary list, so retaining it here!

Sams Urlaub

1. visited museum
(last year)

2. visit Switzerland
(last year)

3. eat pizza
(this year)

4. read a book
(this year)

5. meet a friend
(this year)

6. dance
(last year)

speaking / listening

Teacher notes:

- Instruct students not to say last holiday | this holiday, but to indicate tense by the verb form.
- Partner ticks past or present in response grid
- Verbs in past tense are all regular, but note 'besuchen' and 'besichtigen'.

Chloes Urlaub

1. play football
(this year)

2. write postcards
(this year)

3. play tennis
(last year)

4. eat ice cream
(this year)

5. visit Italy
(last year)

6. dance
(last year)

Example resources for Spanish & How to create a grammar sequence

- 1) Explanation
- 2) Reading
- 3) Listening
- 4) Writing (controlled)
- 5) Speaking (controlled)

We're now going to look at a sequence of resources for teaching Reflexive 'me' in Spanish.

This sequence will also explain 'How to create a grammar sequence'. The sequence of resources has been annotated to illustrate useful features to think about and include when designing new grammar teaching resources, based on NCELP's recommendations.

As you go through this next sequence of resources: you can first discuss the content of the resource itself (as with the previous sequences), and then show the annotations explaining how the resource was created.

Reflexive 'me':

Doing something to yourself

Use of standard grammatical terminology is fine. This draws on and extends knowledge from KS2.

Reference can be made to pupils' L1. This is especially useful if there are L1-L2 differences.

Provide a short, explicit explanation of meaning (or function) and form.

It is fine to teach part of a rule and then add a variation later. Teachers can decide whether to include the 'something to know more later' in their explanation.

Something to know for later! Reflexive pronouns go **after** the infinitive form of a verb. For now, we will just practise reflexives when they come before verbs.

Doing something to yourself : Reflexive 'me'

Sometimes, the 'doer' (subject) and 'receiver' (object) of an action are the same person.

For example, 'I hurt **myself**' or '**he** hits **himself**'

Words like 'myself' or 'himself' are called **reflexive pronouns**.

Spanish also has reflexive pronouns. When you do something to yourself, use '**me**' before a verb.

Look at the difference between:

<u>Lavo el coche</u>	→	I wash the car
Me lavo	→	I wash myself

NCELP National Centre for Excellence for Language Pedagogy Nick Avery / Emma Marden / Rachel Hawkes UNIVERSITY of York CC BY NC ND

Bold / underlining can be used to highlight L1-L2 grammatical connections.

Focus on a pair or very small set of features (e.g. verb with reflexive 'me' vs verb without reflexive 'me'), particularly at the early stages. **Examples are essential!**

NCELP National Centre for Excellence for Language Pedagogy UNIVERSITY of York CC BY NC ND

Show the grammar explanation first, then click to display the annotations.

Teachers can skip the speech bubble if they wish. It is ok to teach part of a rule and then add a variation later. Or you might want to mention this here now. Either way, just giving this information here or not, won't make much difference to learning, as the pupils will just practise the reflexive pronoun 'before the verb' here.

Almost any verb can be 'reflexive'!

hablar - to talk

hablo mucho → I talk a lot
me hablo → I talk to myself

sacar fotos - to take photos

saco fotos de mi amigo → I take photos of my friend
me saco fotos → I take photos of myself

escribir - to write

escribo a mi hermano → I write to my brother
me escribo → I write to myself

Use of animation: the teacher clicks to reveal the English translation (needs to be in a separate textbox to enable animation).

This allows for interactive elicitation during the explanation.

Ask the pupils: Imagine: When might you say 'I talk to myself' ?!
When might you say you 'write to yourself'? Ever write yourself reminders, or send yourself a text to remind yourself to do something?
You will get some fun answers. The idea is to convey that 'notion' of reflexiveness. It can be applied to any verb, really! You just need a context for it to make sense.

lavar – to wash

lavo el perro → I wash the dog
me lavo → I wash [myself]

levantar – to lift / get up / raise

levanto la mano → I lift up/raise my hand
me levanto → I get [myself] up

despertar – to wake up

despierto a mi madre → I wake my mum up
me despierto → I wake [myself] up

In English, we don't always say the reflexive pronoun!

The 'reflexive meaning' is just assumed.

Further examples are optional. Here we use them to show that many common verbs can be reflexive.

A one-slide explanation is sufficient to introduce most grammar features.

Notice that in English, we don't always say the reflexive pronoun - we assume it!

Esteban is a carer and has written an anonymous article about his daily life. Some language **might** be missing.

Read the sentences and tick true or false.

1. Me levanto a las ocho.	Esteban gets up at eight am.	✓	
2. Despierto a las siete.	Esteban wakes up at seven am.		✓
3. Lavo a las nueve.	He washes someone else at nine am.	✓	
4. Saco fotos.	He takes photos of himself.		✓
5. Me preparo un café.	He makes someone else a coffee.		✓
6. Llamo.	He calls someone else.	✓	
7. Me escribo.	He writes to someone else.		✓
8. Enseño español.	He teaches himself Spanish.		✓
9. Quemo.	He burns something (!)	✓	
10. Me presento.	He introduces himself to someone.	✓	

This slide shows the reading activity. The next slide explains key features of the task.

Verb frequency rankings (1 is the most frequent word in Spanish):

levantar [354]; despertar [894]; lavar [1676]; sacar [273]; preparar [570]; llamar [122]; escribir [198]; enseñar [610]; quemar [1648]; presentar [235].

Source: Davies, K. and Davies, K. (2018). A frequency dictionary of Spanish: Core vocabulary for learners (2nd ed.). London: Routledge

Whenever possible, use meaningful contexts.

Esteban is a carer and has written an anonymous article about his daily life. Some language **might** be missing.

leer

Begin with reading and listening activities to establish and practise grammatical knowledge.

Read the sentences and tick true or false.

	True	False
1. Me levanto a las ocho.		
2. Despierto a las siete.		
3. Lavo a las nueve.		
4. Saco fotos.		
5. Me preparo un café.		
6. Llamo.		
7. Me escribo.		
8. Enseño español.		
9. Quemo.		
10. Me presento.		

Remove cues so that learners have to pay attention to the grammar feature to complete activity.

Tip: Part of a sentence can be 'missing'. In this case, we removed the names of the people who were the objects of the action as this is an obvious cue for understanding 'action done to other person'.

Statements in true/false activity require an active choice between 'action done to self' and 'action done to other person'.

Click to display each annotation

Listen to the sentences. You will hear the start of the sentence. The rest is missing.

Decide whether the start of the sentence matches picture A or B.

	Picture A	Picture B

The tables for most practice activities are simple. Students can simply write 1-10 in their books to avoid printing!

NCELP National Centre for Excellence for Language Pedagogy Nick Avery / Emma Marsden / Rachel Hawkes UNIVERSITY of York CC BY NC ND

NCELP National Centre for Excellence for Language Pedagogy UNIVERSITY of York CC BY NC ND

*Explain listening activity and then click to display annotation.

Blank grid for students. In this activity, students hear a verb with or without reflexive pronoun 'me' and have to decide which of two pictures matches it.

Each pair of pictures depicts (1) 'action being done to (my)self' and (2) 'action being done to another person / thing'.

Note that part of each sentence is 'missing' and students only hear the verb, with or without reflexive pronoun. This is done to remove non-grammatical cues that learners often rely on for meaning (e.g. an object after a transitive verb).

Verb frequency rankings (1 is the most common word in Spanish): escribir [198]; sacar [273]; preguntar [219]; quemar [1648]; llamar [122]; lavar [1676]; secar [2239]; mirar [125]; levantar [354]; presentar [235].

Hi Maria,
Don't forget the bills!

escuchar

NCELP National Centre for Excellence for Language Pedagogy Nick Avery / Emma Marsden / Rachel Hawkes UNIVERSITY of York

An action button can be inserted to play audio in powerpoints (go to *insert* -> *shapes* -> *action button*). Consider using orange to make it stand out.

An active choice is required between the meanings represented by the two pictures ('action done to self' versus 'action done to other person').

Most NCELP listening and reading practice activities have around 10 items.

It is important to vary the order of picture (a) and (b). E.g. If (a) is always the 'action done to self', learners might not have to look at both pictures in order to make a decision.

Ticks can be animated so that students can be given item-by-item feedback.

NB Ticks may need to be within their own textbox for animation to work.

Annotations for listening activity answer slide.

Looking after my Grandpa

Margarita and Simón spend a lot of time looking after their elderly Grandpas.

They also find time to do things themselves.

What do they do to help? And what do they do themselves?

Student A: you are Margarita. Write 6 sentences using the cards.
 Student B: you are Simón. Write 6 sentences using the cards.

Afterwards, compare your answers and complete the grid together.

escribir

NCELP National Centre for Excellence
for Language Pedagogy

Wherever possible, animate instructions so that they appear line by line.

This makes them easier for learners to follow.

NCELP National Centre for Excellence
for Language Pedagogy

*Explain writing activity and then click to display annotation.

Students will need to write 'a mi abuelo' if the action is done to the grandfather.

Note that in this activity Student A and B's cards have the same actions – the only difference is the 'receiver' of the action.

The activity is designed in this way so that students can then compare what their characters do afterwards (see slide 20).

Student A
You are Margarita.
Using the prompt cards, write six sentences about things you do to yourself and your Grandpa each day.

get up prepare coffee take photos

(myself) (myself) (myself)

teach Spanish wash write

NCELP National Centre for Excellence for Language Pedagogy Nick Avery / Emma Mandan / Rachel Hawkins

High-frequency language is chosen for the activity. NCELP word frequency lists can be used to check this.

Note that the prompt cards do not have any Spanish on. We can expect learners to recall the target language themselves here, having already encountered it in the reading/listening activities. The following slide offers help if needed.

Student B
You are Simón.
Using the prompt cards, write six sentences about things you do to yourself and your Grandpa each day.

get up prepare coffee take photos

(myself) (myself) (myself)

teach Spanish wash write

NCELP National Centre for Excellence for Language Pedagogy Nick Avery / Emma Mandan / Rachel Hawkins

Students A and B can exchange information about the same activities, but with differences in meaning that are conveyed by the grammar feature (e.g. reflexive vs non-reflexive meaning).

The same can be done for differences in tense (e.g. past vs present), person (e.g. I vs s/he), number (e.g. singular vs plural) and others.

NCELP National Centre for Excellence for Language Pedagogy

*Show the activity cards for student A and student B. Then click to display the annotations.

Verb frequency rankings: levantar [354]; preparar [570]; sacar [273]; lavar [1676]; escribir [198]; enseñar [610].

Need help?

- get up – levantar
- prepare coffee – preparar café
- take photos – sacar fotos
- teach Spanish – enseñar español
- wash – lavar
- write – escribir

This slide can be used as a “revision and knowledge check” before the main activity.

escribir

Vocabulary support slide for writing activity.
Click to show annotation.

Compare the sentences that you and your partner have written.

Complete the grid together.

	Margarita	Simón	Both	Neither
Who gets their Grandpa up?				
Who prepares coffee for him/herself?				
Who takes photos of him/herself?				
Who teaches Grandpa Spanish?				
Who washes their Grandpa?				
Who writes (notes) to him/herself?				

The prompt cards can be designed for learners to complete a grid of four columns (like this one) or a grid of just two columns (Margarita, Simón only)

Here we included four because, at this stage of the activity, the two students are completing the grid together and so can be challenged a little more.

leer

*Explain the grid and then click to show annotations.

Blank grid for students

The prompt cards should be turned over when they complete this grid as they should be comparing each other's sentences. Afterwards, they can turn cards back over to check answers.

 get up	 prepare coffee	 take photos
 teach Spanish	 wash	 write

Student A
You are Margarita
Using the prompt cards, tell your partner six things you do to yourself and your Grandpa each day.

 get up	 prepare coffee	 take photos
 teach Spanish	 wash	 write

Student B
You are Simón.
Using the prompt cards, tell your partner six things you do to yourself and your Grandpa each day.

The actions on the prompt cards for speaking/listening are the same as in the previous activity (so the lexicon is known), but information about 'action done to self' vs 'action done to other' has been changed.

But, vocabulary can be varied if other previously learnt words can be used in a meaningful context with reflexive and non-reflexive meaning.

Activity cards for Speaking/Listening activity.
Show activity cards and then click to show the annotations.

NB The verbs have been kept the same as in the writing activity, but absence/presence of reflexive pronoun on the prompt cards has been changed.

Verb frequency rankings: levantar [354]; preparar [570]; sacar [273]; lavar [1676]; escribir [198]; enseñar [610].

Here, students have (near-)identical grids; the only difference is 'himself' / 'herself'.

When the response grid for Student A and B is the same, it can be displayed on the board and copied into pupils' books, rather than printed.

On completion of the grid, students can be asked to compare grids and find which two activities they both do to themselves (answer: prepare, coffee, write)

Further resources: Resources portal

Other grammar resources available here: <https://resources.ncelp.org>

Searchable database.

You will get alerts when new material has been uploaded.

For now, continue to use: <https://ncelp.org/resources/resource-portal/>

For the phonics, vocabulary, grammar, and residential materials

Eventually, all will be put on the database, and so searchable(☺), using fine-grained search terms and/or the title of the document.

Show the Resources portal, if there is internet. Explore what is available. Stress we are adding things every day! And teachers in the network will receive alerts when new things arrive!

See also the RESOURCES tab, under Resources Portal, under **Grammar**

Hands on: Developing resources (R & L)

Activity: Develop a grammar activity

Use the principles you've seen illustrated.

Perhaps choose one of the problematic grammar features discussed earlier. Warning! the principles can't always be applied easily, e.g. to gender on articles in French or German (one coming soon on the portal!). Perhaps think about tense (present versus past, or present versus future)?

Reminders:

- Practise pairs of grammar features with contrasting meanings (or functions)
- Strip out all other cues that might stop the learner focussing on the grammar features, so that the target grammar features are *task-essential*
(e.g. a car horn covers the subject pronoun, or a paint splodge obscures the temporal adverb, a computerised voice strips out intonation that might give a clue to interrogatives)
- Make sure that the activities actually **provide** the feature you are focusing on in the input and make learners use it to interpret meaning

Developing resources for grammar teaching

About 15 minutes

Now we have reviewed a sequence of grammar teaching resources in each of the three languages.

We are now going to spend some time developing ideas for other resources.

Activity: Split the teachers into 4 groups, working individually or in pairs, to design a R or L or S or W activity (i.e., one activity each). Only a few items need to be designed for each type of activity, e.g., about five example items to illustrate the general point and design of the activity. Allow time for feedback to discuss the activities that have been created, always keeping in mind the key grammar teaching principles discussed in the session. Allow plenty of time for discussing ideas, coming up with example activities and reviewing and discussing together.

This slide provides reminders for those who wish to develop a listening or reading activity for one of the problematic grammatical features discussed earlier in the session (see slides 6 to 8 and discussion of Handout 1). The next slide provides reminders about W and S activities.

If they suggest gender on articles, try to steer them on to something more concrete and more straightforward to do using the principles and examples they have seen today. But,

please note, NCELP are putting a resource on the portal very soon relating to gender in articles.

However, adjectival agreement for gender IS very doable with the kind of L & R activities we have seen here today. For example, the learners hear an adjective (with either a masculine or a feminine agreement) and then have to decide does it belong to the man (e.g. Mr Trump!) or the woman (his wife!).

Hands on: Developing resources (W & S)

Activity: From the examples provided, choose a *pair of grammar features* in one of the languages and design a writing or speaking activity to add to the sequence.

Reminders:

- Make sure the target grammar features are *task-essential*
- Use a meaningful context, where the speaker (or writer) is using the grammar to communicate a message that the listener (or reader) needs to understand
- Try to avoid providing all of the language that is needed. Encourage learners to try to recall key verbs etc.
- Pictures can be used to prompt particular words, so that learners are given some ideas about what to say

Developing resources for grammar teaching

About 15 minutes

Activity: Split the teachers into 4 groups, working individually or in pairs, to design one of: a R or L or S or W activity.

This slide provides reminders for those who wish to develop a controlled production practice activity.

2 examples of input practice are provided (one from French, one from Spanish), for one pair of grammar features (or just choose one language if there is consensus in the group).

In the slides that follow are L/R activities for tú/vosotros in Spanish and tu/vous in French. Teachers could try to develop W/S tasks to follow on from these.

Teachers can choose one and then develop a writing and/or speaking activity to practise **that pair of grammar features**.

Key principle: learners must actively select which grammar they need - not a mechanical repetition of one pattern

Getting the grammar right must matter for communication – their partner or the teacher or the other children in the class should have some reciprocal listening or reading activity that demonstrates that the learners who are PRODUCING the grammar

have successfully communicated their message - using the grammar. Recall the response grids that were used in the activities you saw just now.

Talking to others: *tu* and *vous*

2nd person singular vs 2nd person plural

Talking to others: *tu* and *vous*

When you say 'you' (**vous**) to *more than one* person, use a different **verb form** from when you say 'you' (**tu**) to *one* person.

For example:

To one person:

tu joues →

tu ne manges pas →

To more than one person:

vous jou**ez**

vous ne mang**ez** pas

The following activity will help you to realise that the '**ez**' on the verb means something!

This slide is the animated explanation of the difference between the present tense second person singular and second person plural forms of verbs (the idea being that the learner will learn to spot the -ez on the plural form).

Talking to others: *tu* and *vous*

ANSWERS

Lire

Decide whether each sentence begins with '**tu**' (talking to one person) or with '**vous**' (talking to more than one person). Remember that it is the **verb ending** that tells you this!

		To one person (tu) ✓	To more than one (vous) ✓
1 avez un animal?		✓
2 as un frère?	✓	
3 as les cheveux courts?	✓	
4 avez les cheveux longs.		✓
5 mets une chemise?	✓	
6 mettez un pantalon?		✓
7 donnez un cadeau?		✓
8 donnes des euros?	✓	
9 jouez au tennis?		✓
10 joues au foot?	✓	

This reading exercise requires the learner to notice the form of the verb (specifically the **-ez** of the *vous* form) as the only means of obtaining the correct answer.

To complete the task, learners can simply work from the board, writing 1-10 in their books, and either '*tu*' or '*vous*' for each question, or alternatively, there is an A4 worksheet with questions 1-20.

Frequency

Verb and other vocabulary frequency rankings (1 is the most common word in French): avoir [8]; mettre [27]; donner [46]; jouer [219]; animal [1002]; frère [1043]; cheveux [2296]; chemise [3892]; pantalon [4670]; cadeau [2298]; euro [1753]; tennis [3857]; foot(ball) [2602]; long [202]; court [545].

Talking to 'you' vs more than one 'you': Verbs with 'tú' and 'vosotros'

Talking to 'you' vs more than one 'you': Verbs with 'tú' and 'vosotros'

Spanish uses different verb endings for *tú* (one 'you') and *vosotros* (more than one 'you').

Compare:

1. Escuch**as** → you listen (**one** 'you')
2. Escuch**áis** → you listen (**more than one** 'you')

So, for regular Spanish verbs ending in -ar (e.g. hablar):

Remove -ar and add **-as** for one 'you'

Remove -ar and add **-áis** for more than one 'you'

Is this person talking to just you or more than one of you?! Listen to each verb. Tick if it is used for **one** 'you' or **more than one** 'you'.

		one 'you'	more than one 'you'

Question words! What, when, why, which...

- Question words cross over the vocabulary and grammar strands
- To teach the formation of wh-questions, learners first need secure knowledge of the question words themselves!
- But... common chunks (formulae) often give misleading evidence about the meaning of question words e.g.,

- **quel** age as-tu? 'quel' doesn't generally express English 'how'!
- **comment** tu t'appelles? 'comment' doesn't usually express English 'what'!

(If such chunks of language are taught, learners need help breaking down such chunks)

- **Learners need to know the more 'reliable' words for frequent question words**

**NB: The French versions of two PPTs are inserted here – Questions words introduction and Questions words practice.
The equivalent resources exist (and have been uploaded already) for Spanish and German.**

Slap the board.

Could also be done the other way around for reading practice.

Quelle est la question?

- Je joue au football.

- ?

- au collège.

This activity doesn't use all of the question words, but is a very useful one for practising questions in a scaffolded, yet 'contingent' context. Students only know which question word to use by looking at both lines of dialogue either side and processing for meaning. As the first line is repeated each time, the cognitive load is firmly focused on the 3rd utterance to cue the correct question word.

Using the Q words in context to reinforce their meaning. Lines 1 – 3 are there. Students supply the question word orally. Do a couple first to model, then give each pair 20 seconds to say each dialogue first before taking the answer whole class for the rest of the slides.

Quelle est la question?

- Je joue au football.

- ? **Quand?**

- le samedi.

Quelle est la question?

- Je joue au football.
- ? **Comment?**
- JE JOUE AU FOOTBALL!

This is an additional use of 'comment' we are introducing here.

Quelle est la question?

- Je joue au football.

- ? **Pourquoi?**

- C'est génial!

Quelle est la question?

- Je joue au football.

- ?

**Avec
qui?**

- mes amis.

This is a way to introduce a variant of “qui” and one that is very useful for students, when talking about what they do with their friends / family.

On va parler!

• J'apprends le français.

• ?

Pourquoi?

•

ma classe	✓	J'APPRENDS LE FRANÇAIS!	✓	le vendredi	✓
au collège	✓			c'est très important	✓

Pair work

Question words are spontaneous

Responses are then supported.

After students have tried this out for themselves, use the animations to elicit their responses as a whole class orally and give them feedback.

Students can then create their own sequences of questions and answers, starting with a different statement. Their partner has to select the answer that has to be given.

- 4) Writing (controlled)
- 5) Speaking (controlled)

How to teach and learn grammar

We now provide examples of sequences of activities for each of the languages: Spanish, French & German

For each language we will present at least one full sequence:

- 1) Explanation
- 2) Reading
- 3) Listening
- 4) Writing (controlled)
- 5) Speaking (controlled)

But we will also provide examples of other grammar features, to show how the principles can be extended to a range of features, modes, modalities.

We give examples of 1) verb morphology (that is, verb inflections for person,

number, tense) and 2) for syntax (S V order in French) and negation in Spanish.

NCELP also have developed or are currently developing materials for adjectival agreement, for articles, for aspect (imperfect in French - whether something is ongoing or complete).

How to teach and learn grammar

Teacher:	Date:	Year Group (and set):	
Observer:	School:	Language:	
Lesson learning objective:		Questions following the lesson / teaching sequence	
<p>NB: There is no expectation that all these elements would be present in one lesson.</p> <p>From this lesson, there is evidence that the learners:</p> <ul style="list-style-type: none"> <input type="checkbox"/> understand and use grammatical terminology, building on knowledge from KS2 <input type="checkbox"/> understand explicit and succinct descriptions of the target grammar features <input type="checkbox"/> understand how one target feature compares with another feature to illustrate their different meanings (e.g. je fais versus j'ai fait; der Hund versus den Hund) <input type="checkbox"/> understand problems they might have, including complex L1-L2 differences <input type="checkbox"/> undertake 'input practice', distinguishing the two features and their meanings / functions in reading AND listening (where sounds make a difference) <input type="checkbox"/> encounter the grammar features with a varied lexicon (e.g., a range of high frequency verbs, or nouns), whilst focusing their attention on the meaning of the grammar features <input type="checkbox"/> receive corrective feedback, item by item wherever possible <input type="checkbox"/> after input practice, practise producing the target features at phrase or sentence level, in speech and writing, in activities where the feature is essential to communicate meaning <input type="checkbox"/> after substantial practice, move on to freer production, in speech and writing, where learners must retrieve the grammar feature from memory to communicate meaning <p>From this lesson, there is evidence that the teacher has:</p> <ul style="list-style-type: none"> <input type="checkbox"/> ensured that other 'cues' for the target meaning/function are removed (e.g. temporal adverbs if both adverbs and the grammar convey tense; intonation if both intonation and word order convey the interrogative function) <input type="checkbox"/> guided learners' production of the grammar feature in free writing or speech, as appropriate <input type="checkbox"/> ensured grammar features are revisited at frequent, planned intervals <input type="checkbox"/> assessed grammar knowledge formally (in planned tests) and informally (spontaneously in class) 		<p>1. In your lesson, to what extent do you think that learners successfully:</p> <ul style="list-style-type: none"> • learned new grammar features? • consolidated knowledge of previously taught grammar features? • developed accurate use of grammar knowledge in comprehension and production, in oral and written modalities? • developed fluency/automaticity? <p>2. How do you know?</p> <p>3. What aspects of grammar learning and teaching are you pleased with?</p> <p>4. What do you think are the next steps for this class in terms of their grammar development?</p> <p>5. What would help you to further ensure that previously taught grammar features are consolidated and revisited systematically?</p> <p>6. To what extent are learners gaining from the following approaches to developing their grammar knowledge:</p> <ul style="list-style-type: none"> • providing succinct explanations of new grammar features • comparing two grammar features with contrasting meanings / functions • initially practising the grammar features in reading and listening when the features are essential for understanding meaning • providing extensive scaffolded production practice, gradually introducing meaningful, freer production practice • regular re-visiting (i.e., spaced practice) • using the grammar feature in multiple contexts (oral, written, comprehension and production) • doing information gap tasks, where production of the target feature is essential to communicate meaning • short, regular assessments to check learning is incremental <p>7. Are there any aspects of grammar teaching that you want to develop further?</p>	

In the Autumn, we will be exploring "What children bring with them from KS2"

Grammar teaching discussion document.

In this session we have explored the key principles underpinning NCELP's recommendations for teaching grammar, and explored lots of resources for teaching different bits of grammar across the three languages.

Handout 6a is the Grammar teaching discussion document that capture the key grammar teaching recommendations. This can be used to guide and structure discussions about grammar teaching amongst the Lead and Hub schools.

Handout 6a – Grammar teaching discussion (and handout 6b: grammar teaching discussion sheet incl. VEO tags)

Allow time for teachers to read this document. They will not have seen it before but will be familiar with the lay out.

Explain that Autumn term will include session on knowledge about language from KS2. So more information on this to come.

Discussion / any questions – this should align with what we covered in the earlier parts today

Learners...
Introducing the grammar knowledge
understand and use grammatical terminology, building on knowledge from KS2
understand explicit and succinct descriptions of the target grammar features
understand how one target feature compares with another feature to illustrate their different meanings (e.g. <i>je fais</i> versus <i>j'ai fait</i> ; <i>der Hund</i> versus <i>den Hund</i>)
understand problems they might have, including complex L1-L2 differences
Embedding and Consolidating: Practice
undertake 'input practice', distinguishing the two features and their meanings / functions in reading AND listening (where sounds make a difference)
encounter the grammar features with a <i>varied lexicon</i> (e.g., a range of high frequency verbs, or nouns), whilst focusing their attention on the meaning of the grammar features
receive corrective feedback, item by item wherever possible
after input practice, practise <i>producing</i> the target features at phrase or sentence level, in speech and writing, in activities where the feature is essential to communicate meaning
Extending
after substantial practice, move on to freer production, in speech and writing, where learners must retrieve the grammar feature from memory to communicate meaning
Teachers...
ensured that other 'cues' for the target meaning/function are removed (e.g. temporal adverbs if both adverbs and the grammar convey tense; intonation if both intonation and word order convey the interrogative function)
guided learners' production of the grammar feature in free writing or speech, as appropriate
ensured grammar features are revisited at frequent, planned intervals
assessed grammar knowledge formally (in planned tests) and informally (spontaneously in class)

How to teach and learn grammar

This slide takes the statements from the Grammar Teaching Discussion document and puts them into phases of grammar learning.

The different phases are not clear cut, they definitely merge in to each other: you practise when you are establishing knowledge for the first time, and consolidating knowledge is often also extending it.

Many activities can be repeated for different purposes, depending on how well the grammar is already embedded.

These ways of working with grammar are intended to broaden thinking about the range of opportunities we give learners in and outside the classroom.

Update about Scheme of Work

Resources shared so far through the TRG sessions are activity ideas for you to be trying with your classes, largely fitting them around your current plans.

By the end of Summer term 2019: draft SoW for years 7 and 8 French

By the start of Autumn term 2019: draft SoW for KS3 all three languages

Not expecting schools to abandon current SoW!

We would only suggest “switch to NCELP SoW” once we have a full set of supporting resources in place

NB: It's important to say that the SOW development is ongoing - hope to have draft in one language, for year 7 and hopefully also 8, by end of summer term. Version in all three languages by end of summer holidays.

In this TRG session we have introduced ideas, principles, and resources for teachers to try out and integrate for grammar teaching.

Please note, 2: NCELP's current aim is to get resources and basic principles communicated - so when the SoW is in a fuller draft, it will make sense and won't be arriving in a vacuum, but will have lots of resources to support it and you will understand the principles that underpin it and be able to create materials easily and implement the ideas 'on the hoof' during lessons.

In practical terms, resources and the SoW are having to be developed in tandem, and will be released as they are ready.

Summary of the session

Please complete
the short
feedback survey!

1. Key issue 1: What grammar to teach and when ✓
(determining the difficulty of grammar, order of teaching, setting expectations)
2. Key issue 2: Principles of how to teach grammar (and the concerns!) ✓
3. Summary of key principles for grammar teaching ✓
4. Sample resources ✓
5. Hands-on classroom activity development ✓
6. Grammar teaching discussion document for observing lessons ✓
7. Update on scheme of work ✓

Summarise what has been covered today

Please remind Hub teachers to complete the feedback survey – this should have been sent to them by email.

Ideally they would complete it in the session, at the very end on their devices, so that we get more responses.

Conclusion and next steps

- **Cascade to colleagues in your departments**
- **Plan and resource**

Keep in touch with each other and your lead school, sharing anything you create (or adapt from an NCELP resource). NCELP resources will be added frequently to Resource Portal.

If teachers create their own resources, please send to enquiries@ncelp.org.uk – we can help with copyright free images / audio recordings etc. If the aim is to have the resources uploaded on to the Portal, NCELP will edit and give feedback.

- **Teach and reflect**

Make grammar teaching the focus of your next planned visit / observation. Use the observation schedule as a planning tool and focus for discussion. Share the completed document with us enquiries@ncelp.org.uk.

- **Video parts of lessons where you focus on grammar**

If possible, video parts of your lessons. Upload to VEO and tag.

- **Remind yourself of your next key dates:**

Meaningful Practice TRG
